Brothers Keeper TBT 105

Over the past 4 weeks there have been a notable number of really positive examples where members of a work team have spotted unsafe activity and acted:

- Truck driver spotted man standing too close to the vehicle without proper warning
- Banks-man and supervisor observing driver using pecker. Driver stopped work and asked them to move back.
- Site worker standing within (blind side) and within the arm reach of large excavator. Driver stopped work and asked him to move.

These examples could have resulted in serious incidents. These were avoided due to intervention.

Stepping in a saying something is everyones responsibility – Brothers keeper interventions provide one of the most valuable tools available to us and help reinforce **REAL behavioural change.**
