

What Would Good Have Looked Like?

“Skip the difference” – WWGHLL 24

Can **YOU** spot the difference between these two pictures?

- Has no signs
- Tarp not covering skip correctly
- Ballast left out of compound, and not put in skip
- 2 pallets left on site in compound and one left out of compound
- Overflowing bin
- Herras fence not in footing
- Left broom

- Has signs
- Tarp covering skip correctly
- Hi Vis netting around skip
- Neat and tidy
- NO COMPLAINTS**

What’s the Worst Thing That Could Happen?

The skip could fill with water, the fence could blow over, the site shop could complain, the skip could get stolen, someone could trip up and a costly revisit to site to put things right.

PLEASE ENSURE YOU LEAVE SKIPS IN A SECURE STATE WHEN LEAVING SITE
